

**NOT an Option:** images in Microsoft Word, Excel, PowerPoint or other presentation files

Files may be e-mailed to [sales@ablerecognition.com](mailto:sales@ablerecognition.com) and please reference with your order number.

## What Is The Difference Between Vector And Raster Files?

**Vector Artwork:** Is two dimensional artwork that is made up of mathematical lines and curves. Vector files are resolution independent and can be enlarged infinitely without losing image quality. Typical File Types: .ai .eps .ps .indd .pdf .cdr  
Important Note: The vector file types shown above can contain raster art. If you are unsure about your files have one of our art coordinators verify your artwork.

**Raster Artwork:** Is any artwork that is composed digitally of horizontal and vertical rows of pixels to make up an image. Raster files are resolution dependent and cannot be enlarged without losing image quality. Typical File Types: .psd .tif .jpg .gif .bmp  
Important Note: The file types above are always raster images and are never usable for our production process.
